Hello and welcome to the Visual Studio License Instructions

This license is needed to use Microsoft Developer Software such as Visual Studio IDE, SQL, Microsoft Azure and other cloud offerings such as Visual Studio Team Services. There are 3 offerings that we can select depending on the requirements of the project. The three Developer Tools offerings are Visual Studio Enterprise with MSDN, Visual Studio Professional with MSDN, and MSDN Platforms. Each offering description is available in the Service Now form that will be shown during registration process. Cost is also shown in the form, so you will know how much it will charge to your project. For a detailed comparison of these offerings, please review the Visual Studio offerings matrix

Costs:

Offering	Monthly Cost	Annual Cost
Visual Studio Professional	USD 12.25	USD 147
Visual Studio Enterprise	USD 70.87	USD 850.44

This guide will help you in the registration process.

A -To request this license please go to: VSTS License Request.

Then click on the correct license level, select "Visual Studio Professional". (only If you are part of the Test team please select ""Visual Studio Enterprise".

Then click on

Then complete all the requested information.
* **WBS Element/Charge Code:** Use the same cost collector you charge your hours to.
* **Approver EID/Sponsor:** Confirm with your lead/supervisor. (Manager & above).

* **Business Reason:** Client Delivery
* **Business Justification:** Just indicate your role. DBA, Tester, etc and the project/Scrum/Team you support MMP.
Then click on:

B- An email will be received to register an email account that will be used for MSDN registration. We suggest using your Accenture email account for this purpose.

C- A confirmation email will be received from MSDNBenefits@microsoft.com after approval.

D- Activate your subscription as stated in the email. Use the email provided and follow the wizard.

E- Verify your subscription in https://my.visualstudio.com/Subscriptions site. Once confirmed, you don't need to proceed on the next steps.

If you use a non-Accenture email account during MSDN registration, you may need to link your live ID in order to use the upcoming Visual Studio Team Services that will replace the existing on premise TFS site. Go to https://my.visualstudio.com and then to Subscriptions section.

Click View alternate account link and provide your Accenture email. Submit the form.

> NOTE: If you did not receive any email from steps 4 and/or 5, do not worry. You can still continue with the registration after 2-3 working days.

Go to https://my.visualstudio.com

Type your Accenture Email address in the Visual Studio login page. Click Continue.

You maybe prompted to choose between a "Work or school account" and a "Personal account". Choose "Work or school account"

Accenture ESO page will be displayed. Enter your Accenture Enterprise credential on this case.

Follow the wizard and viola, you will have your MSDN subscription. You can verify it under Subscriptions page.

> If you use NON-Accenture email in MSDN registration, your subscription will not be visible when your login using your Accenture email. It will only be visible when your login your live account. Just ensure you follow steps 8 to 10 to link your live-MSDN connected account with your Accenture email.

After the completion of these steps (or if you have any doubts or questions), please provide a sign off to: MMP.PMO
